

# Perform Zone Version 16.0 Release notes

## Minor Updates

### Placing Job keeps adverts up

Previously, when you placed a job, your adverts came down and your job status changes to Placed. If you didn't want that to happen, you'd have to increase your jobs "Total jobs" in Job details then place the candidate.

We've changed that.

Now, if you place a candidate, your adverts remain up and your job status stays as active. When you change the job status to Placed, the adverts will come down.

### Ability to expand text entry boxes

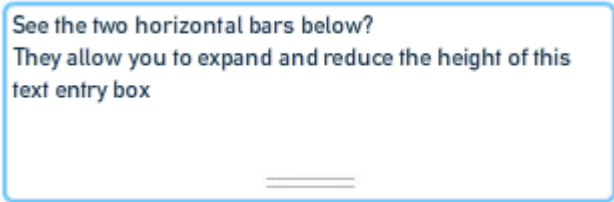

Text boxes can now be made larger.

See your notes without having to scroll within a text box.

Drag the two horizontal lines at the bottom of the text box.

#### Interview notes

See the two horizontal bars below?  
They allow you to expand and reduce the height of this text entry box

## Bugs Fixed

- Google Chrome copy and paste delay fixed: Chrome had introduced a plugin within one of their latest upgrades that conflicts with copy and pasting in Flash. Our developers have created a fix that resolved this issue.
- Users prevented from downloading CSV files from resume search
- Users were unable to bulk email candidates from a resume search
- Chrome had introduced a plugin within one of their latest upgrades that conflicts with copy and pasting in Flash. Our developers have created a fix that resolved this issue.
